

AURA Private Banking - Client Onboarding SOP (v5)

Section 1: Core Customer Due Diligence (CDD)

All new private banking relationships require full identity verification before any account opening. For individual clients, the following primary documents are mandatory: (a) A valid, unexpired government-issued passport, (b) Proof of residential address (e.g., utility bill or bank statement dated within the last 90 days). For corporate entities or trusts, onboarding officers must obtain certificate of incorporation, memorandum of association, and verify the identity of all Beneficial Owners holding more than 10% equity.

Section 2: Enhanced Due Diligence (EDD) for High-Risk Clients

Relationships identified as high-risk—including Politically Exposed Persons (PEPs), clients from high-risk jurisdictions, and complex asset structures—require mandatory Enhanced Due Diligence. EDD procedures dictate: (1) Corroboration of Source of Wealth (SoW) and Source of Funds (SoF) using audited financial statements, tax filings, or proof of inheritance. (2) Mandatory sign-off from the Head of Compliance and the regional Risk Committee. (3) Annual screening and review cycle, rather than the standard three-year review cycle for low-risk clients.

Section 3: Verification Safeguards and Escapes

In the event of verification failure or matching indicators during screening, onboarding officers must flag the file in the AURA KYC console. Temporary restrictions will apply, blocking outgoing transfers until manual review is completed by the Onboarding Security Team. The maximum resolution window for flagged files is 48 business hours, after which the relationship proposal must either be formally escalated to executive directors or rejected.
